

The Chesterfield Green Team
in partnership with
SEWA International
&
United Nations Association-USA

We are happy to announce that we will be delivering a reusable shopping bag to each household in Chesterfield Township.

Sponsors donated funds to produce the bags at no cost to residents. We hope to promote sustainable practices and reduce our reliance on single use plastic bags and ask that you support our efforts and use the bags when shopping!

You will see Green Team, SEWA and UNA-USA volunteers out in our township delivering bags to each residence over the next couple of weeks.

New Jersey is currently transitioning to the use of reusable bags instead of plastic bags in an effort to reduce pollution to our ecosystems.

The NJ Senate Bill 864, the strongest plastics reduction law in the nation, will be in full effect in May of 2022.
